

WATER DETENTION PROJECT BENEFIT SUMMARY
NORTH DAKOTA STATE WATER COMMISSION
PLANNING AND EDUCATION DIVISION
SFN 60555 (1/2016)

The following information will be used as part of the agency's project planning, budget development, and project prioritization processes. Project sponsors requesting SWC cost-share that have a project with a total cost of \$500,000 or more are required to provide supplemental information related to project benefits per NDCC 61-02-01.3. If the proposed project has undergone a detailed benefit-cost analysis, that information may be referenced or provided in lieu of the following.

Project Name:
Project Sponsor(s):
Describe existing and anticipated future conditions without the proposed project(s).
If applicable, provide a brief description of costs and impacts related to recent flood events that occurred at current levels of protection. Include information about the magnitude of those events.
Describe how the project(s) will reduce future costs and mitigate future impacts.
Describe the anticipated level of protection the proposed project will provide.

Briefly outline key infrastructure that will be protected by the proposed project, including major utilities or transportation elements, businesses and residences, agricultural acres, or communities.

Describe the amount of water storage this project provides.

Provide the number of acres that will be flooded to detain water and their value, and provide the number of acres and the value of the land to be protected.

Estimate the total number of people expected to benefit from the proposed project and how they will benefit.

Provide any additional project-related benefits that you would like considered.
